Reading

متون زیر را با دقت بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.

Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease. There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes.

43. What is the role of most microbes?

- 3 a) They make you sick. b) They keep you healthy and help you fight disease.
c) They are harmful to humans. d) They are responsible for the spread of viruses.

M

44. Where can you find microbes?

.....

45. How many different types of microbes are there?

.....

43. b

44. We can find them everywhere

45. There are so many types of microbes.

The sky is full of amazing things. There are billions of stars in the sky, and the sun is one of them. There are also eight planets in the sky. Earth is one of them. It's a beautiful place with mountains and rivers, and there are millions of different animals here, too. But there are also some scary things in space. For example, there are black holes. A black hole is a very small thing in space, but it's very heavy. Nothing can escape from a black hole. And there are also asteroids. They're big rocks in space. One asteroid killed all the dinosaurs on our planet 65 million years ago. Finally, there's the moon. It isn't a planet, but it's very important for us. We need the moon because it makes the sea move. The sea moves a lot, so if we didn't have the moon, the sea would be very quiet.

True or False?

- 4 46. The sun is one of the billions of stars in the sky. True False

Answer:

47. What is a black hole?.....

48. What killed all the dinosaurs on our planet?

- a) one star b) a planet c) a black hole d) an asteroid

49. Why do we need the moon?

- a) Because it makes the sea move. b) Because it provides light at night.
c) Because it controls the weather. d) Because it's a planet.

46. true

47. A black hole is a very small thing in space, but it's very heavy

48. d

49. a

N
